Kaspersky Expert Security

In today's volatile and fast growing threat landscape, more and more organizations find themselves facing highly complex and damaging cyber-incidents, caused by APTs, multi-stage or targeted attacks. If it hasn't happened already, it's only a matter of time before your IT security team finds themselves on the front line, facing down one of the new generation of cyberthreats.

Are you ready?

Doing battle with today's cybercriminals means **building consistent ongoing incident investigation and response processes**, nurturing and supporting your IT security talent-base, and making the most of your time and resources.

Kaspersky Expert Security

Kaspersky Expert Security revolutionizes the way your IT security team can take control of complex cyber-incidents. Rather than promising a mythical silver bullet, we adopt a holistic strategy to help equip, inform and reinforce your in-house experts to face down the full spectrum of today's complex threats, APT-like and targeted attacks.

Why do cyber-incidents succeed?

Too late in the day

Ignoring the likelihood of a complex attack and implementing advanced defenses only after a severe incident has occurred

Inefficient approaches

Non-systematic or ineffective methods for handling cyber-incidents based on disparate tools and weak threat intelligence

No back-up plan

No third party on hand to provide immediate support and expert guidance in the event of a cyber-crisis

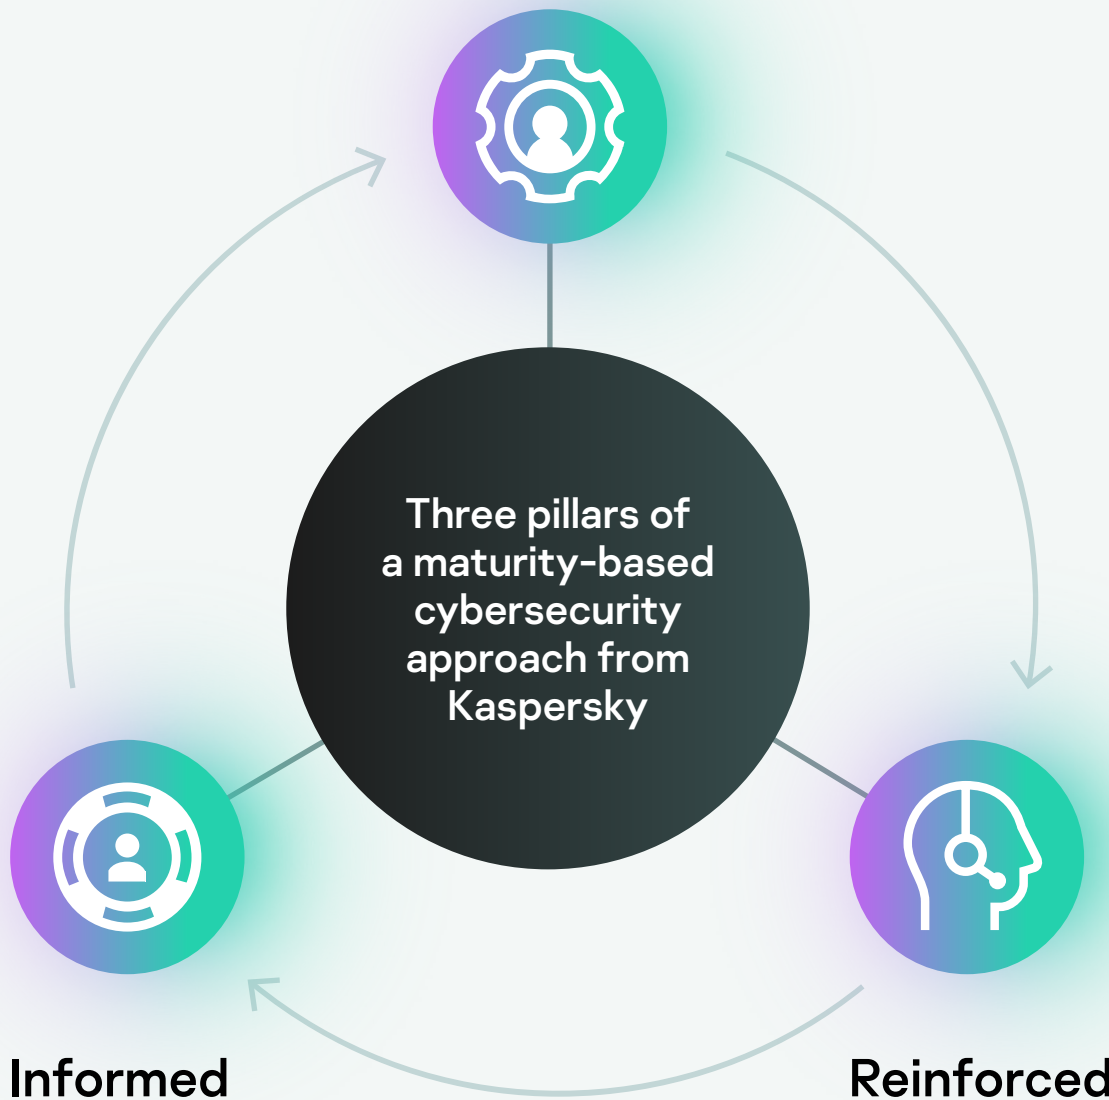

Your expert team
comprehensively
equipped, fully
informed and
expertly reinforced

Expert tech in expert hands

Kaspersky Expert Security will equip your in-house experts with all the advanced technologies, actionable threat intelligence, and technical skills they need to address complex and targeted cyberattacks, together with reassurance that the world's leading cybersecurity minds are right by their side.

Equipped

Equip your in-house experts to address complex cybersecurity incidents

Enrich your knowledge pool with threat intelligence and upskill your experts to deal with complex incidents

Call upon external experts for assessment, immediate support and back-up

Equipped

Reduces IT security labor and operational costs by streamlining and automating incident management processes

Provides complete enterprise-wide visibility and simplifies the building of an incident response process

Reduces false positives and the time analysts need to spend on incident investigation

Reduces the average mean-time-to-detect and mean-time-to-respond to each incident

Extended Detection and Response

Cybersecurity is one area of expertise where even a skilled IT security expert can legitimately blame their tools. Protection from multi-vector attacks and APTs requires a unified and consolidated Extended Detection and Response (XDR) platform that delivers enterprise-wide visibility, eliminates obstructive siloes, prevents 'alert fatigue' and automates routine tasks involved in incident response processes.

Kaspersky Anti Targeted Attack Platform

Benefit from a unified cybersecurity solution. **Kaspersky Anti Targeted Attack Platform** with **Kaspersky EDR** at its core empowers your team with XDR capabilities. Now all key threat entry points – network, web, mail, endpoints and cloud workloads – are under your control, visibility and centralized defense.

Informed

Delivers meaningful context throughout the incident management cycle to maintain analyst focus and help prevent burnout

Helps optimize your investment by aligning your defensive strategy with your specific threat landscape

Supports easy integration into existing security workflows by providing different delivery formats and mechanisms

Increases operational efficiency, while minimizing business disruption and incident impact

Unequaled threat intelligence

Even the best in-house IT security teams need nurturing and developing to deal with constantly evolving cyberthreats. Ongoing education and powerful threat intelligence from a reliable cybersecurity partner is critical.

**Kaspersky
Threat Intelligence**

Integrate actionable, immediate threat intelligence into your security program. **Kaspersky Threat Intelligence** gives you instant access to technical, tactical, operational and strategic Threat Intelligence.

Informed

Up-skills your IT security team to mitigate potential damage from security incidents faster and more effectively

Raises your levels of in-house IT security expertise and builds up internal threat research capabilities

Helps retain and motivate in-house staff through promoting skills-based career development

Saves you time and money on recruiting scarce cybersecurity resources

Comprehensive cybersecurity training

Develop your in-house team's practical skills, including working with digital evidence, analyzing & detecting malicious software, and adopting best practices for incident response, with **Kaspersky Cybersecurity Training**.

YARA**

Reinforced

Detects compromise attempts and mitigates incident impact before this becomes apparent

Helps evaluate your defensive capabilities and identify weak points

Gets your systems and business operations back on track faster

Improves the security of industry-specific infrastructures

A trusted partner

You need a trusted partner with the relevant insights and experience to evaluate your security posture - and be there to help in an emergency with efficient and accurate incident response

The full weight of Kaspersky's expertise: Incident Response, MDR and Assessment

Full enterprise-wide visibility and accurate detection and response, together with relevant threat intelligence and honing of in-house skills, are only a part of the battle. At times, only external expertise can deliver up-to-date guidance and actionable support to eliminate the most complex cyberattacks.

In Short

To fight even the most sophisticated cyber-incidents, and to adapt to the ongoing challenges of a changing threat environment, you need to be equipped with the right advanced technologies, powered by threat intelligence and staffed by skilled and fully informed in-house professionals, and backed by world-class 3rd party expertise.

The result is a full spectrum of defenses against the most complex, APT-like attacks and targeted campaigns. Kaspersky Expert Security offers a complete arsenal of advanced defense technologies and services to boost the effectiveness of your IT-security talents and your SOC team.

Whatever your business needs, now or in future, when it comes to professional IT security — we have the **Kaspersky Expert Security** to make it happen.
